

LinkedIn Profile Checklist

Your LinkedIn profile is more than an online resume.

For a final-year student, it can become a **digital identity that recruiters, HR professionals, alumni, and hiring managers see before an interview.**

Before applying for placements, make sure the profile is **complete, professional, and recruiter-friendly.**

✓ LinkedIn Optimization Checklist

1 Professional Profile Photo

- Clear and recent photo
- Professional appearance
- Simple background
- Avoid selfies, group photos, or casual pictures

2 Strong Headline

Don't write only:

✗ "Student at XYZ College"

Instead, highlight career direction and skills:

✓ "Final-Year Computer Science Student | Python | SQL | AWS | Aspiring Cloud & DevOps Engineer"

3 About Section

Write 4–6 short paragraphs covering:

- Who you are
- What you are learning
- Technical skills
- Projects/interests
- Career aspirations

4 Education

Clearly mention:

- College name
- Degree
- Branch/Specialization
- Expected graduation year

5 Skills

Add relevant technical and professional skills.

Examples:

- Python
- Java
- SQL
- Git & GitHub
- AWS / Azure

- Docker
- Kubernetes
- React
- Communication
- Problem Solving

👉 Keep the skills aligned with the target job role.

6 Projects — VERY IMPORTANT 🚀

Don't simply write:

❌ "Created a web application."

Instead mention:

- ✓ Project name
- ✓ Problem solved
- ✓ Technologies used
- ✓ Your contribution
- ✓ Key features
- ✓ GitHub/demo link

7 Certifications

Add relevant certifications from recognized platforms.

Avoid adding every course completed. Prioritize certifications relevant to the desired career path.

8 GitHub Integration

A strong LinkedIn profile + strong GitHub profile = powerful combination.

Add:

- GitHub link
- Quality projects
- Good README files
- Meaningful repositories
- Consistent activity

9 Featured Section

Use the Featured section to showcase:

- 📌 Best project
- 📌 GitHub repository
- 📌 Portfolio
- 📌 Technical article
- 📌 Certification
- 📌 Achievement

10 Experience / Internship

Include internships, freelance work, training, campus projects, or relevant practical experience.

Focus on **what was done and what was achieved**, not just responsibilities.

1 1 Achievements

Add:

-  Hackathons
-  Coding competitions
-  Technical events
-  Academic achievements
-  Leadership positions
-  Scholarships
-  Awards

1 2 Recommendations & Endorsements

As the profile develops, request genuine recommendations from:

- Professors
- Internship mentors
- Project guides
- Team leads
- Industry mentors

1 3 Custom LinkedIn URL

Create a clean professional URL using the student's name.

1 4 Build a Professional Network

Connect with:

- Alumni
- Recruiters
- HR professionals
- Industry experts
- Engineers
- Hiring managers

Don't just collect connections.

Engage with the ecosystem.

1 5 Start Posting

Don't wait until graduation.

Share:

- Projects
- Technical learnings
- Certifications
- Hackathon experiences
- Internship experiences
- Technical concepts
- Career lessons

Final-Year Student LinkedIn Checklist

- ☐ Professional photo
- ☐ Strong headline
- ☐ Complete About section
- ☐ Updated education
- ☐ Relevant skills
- ☐ 2–4 strong projects
- ☐ GitHub profile
- ☐ Certifications
- ☐ Internship/experience
- ☐ Achievements
- ☐ Featured section
- ☐ Professional URL
- ☐ Relevant connections
- ☐ Regular professional activity

Remember:

 Resume = What you say about yourself.

 GitHub = What you have built.

 LinkedIn = How you present yourself professionally.

 Together, they create a strong **digital professional identity**.

Don't wait until the placement season to build a profile.

Start building it **before recruiters start looking**.
